HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point
NOT Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

The angle is right. The size says stay home.

Southwest can wake Little Point, but the groundswell is only about 1.6 ft under thicker windswell, so the sandbars win.

WHERE IT'S WORKING

- PB north of pier**
★ The call. Real east wind (~10 kt offshore), mid tide (obs 4.5), and the sandbars beat thin 1.6 ft ground. Score 0.87 — go before the west seabreeze. **CALL**
- PB Drive**
Also fine — same 0.87 on the home stretch. Same window. **ALT**
- Calumet**
Score 0.85 and the SW angle is in, but tide is already high for a 0.5–3.5 window (obs 4.5). **SOFT**
- Tourmaline**
Score 0.72 — tide high vs window and wind not its offshore cone. Crowded if you go. **SOFT**
- Little Point**
Scorecard 0.89 loves the SW angle and E wind, but groundswell is only ~1.6 ft under thicker windswell. Skip the drive. **SKIP**

Skip · PB Point is undersize on this SW (0.35). Cliffs aren't clearer than PB on thin ground. OB Pier wants northeast offshore plus a real SW — not this tiny ground. Evening tide fills after dark (sunset ~6:33p). Scripps and Blacks aren't local.

AFTER DARK
SKIP

Go now through 10:30a. Tide is weirdly flat mid this morning (H 3.4@6:08a / L 3.3@8:11a) then rises to H 5.2@3:02p. Observed 4.5 ft @ 6:48a (~+1.1 vs the table). LJAC1 E 90° 10 kt @ 6:18a PT. NWS grid E ~4 kt early, calm mid-morning, W ~4 kt by noon, W-NW ~9 kt mid-afternoon. Under 3 ft by dusk, and the evening fill is after dark (sunset ~6:33p), so no evening call.

SKIP

Little Point on 1.6 ft ground. PB Point on this SW. Calumet once the tide is this high. Cliffs aren't clearer. OB Pier isn't the northeast-offshore recipe. West wind after noon. Anything after dark.

GOTCHAS

Rip risk is low (NWS). Tide is running about +1.1 versus the table. East wind is real (~10 kt) early — good offshore, but it can get punchy. West seabreeze by noon. Pier crowd. Hot inland (~90°F) — fog not the story.
