3–5 ft, sets to 6 (SRF) · W 13–14s

7:00a	***filling (about 5 to 6.4 ft real) — take the medium ones***	**4.5 ft tide**	**E ~4 kt · NWS**	**groundswell + W 9–10s windswell, near your ceiling on the sets**

L 2.6 @ 3:01a · H 5.5 @ 9:31a · L 0.0 @ 5:15p · obs 4.8 @ 5:42a

PB north of pier from about 6:30 to 8:30a on the Anvil twin while the E offshore holds; PB Drive also fine around 11a to 12:30p on the drop. Table tides: L 2.6 @ 3:01a, H 5.5 @ 9:31a, L 0.0 @ 5:15p. The gauge read 4.82 ft at 5:42a against a 3.58 ft prediction, about 1.2 ft over the table, so the high lands near 6.8 ft real and is swampy. LJAC1 was E 7 kt gusting 10 at 5:00a. NWS hourly has E 5 mph at 6–7a, SE then S 5 mph at 8–10a, SW 5 at 11a–noon and SW 10 from 1p. PZZ740 calls variable under 10 kt becoming SW 10 kt this afternoon.

Where it's working

PB north of pier · 6:30–8:30a

LOCAL and BEST (single hero). 46258 SwH 0.9 m (3.0 ft) at 14.3s WSW 250° (overnight 1.1–1.2 m, 3.6–3.9 ft at 12.5–14.3s W) plus a W windsea about 2.6 ft at 10s, and NWS SRF 3 to 5 ft with sets to 6 and HIGH rips. Same size as yesterday, but this morning has a real offshore: LJAC1 E 7 kt gusting 10 at 5:00a, NWS E 5 mph through 7a. Scorecard 1.00 live at first light with the tide still mid and rising.

CALL

- **Also fine · PB Drive ~11a–12:30p**
  After the very full 9:31a high (about 6.8 ft real), PB Drive (scorecard 0.88 at 11a) comes back on the drop. Wind turns light S to SW 5 mph, so expect some texture, then SW 10 from about 1p.
  ALSO OK

- **If you have 3 hours · Blacks**
  Scorecard 0.95–0.98 through the morning (46225 SwH 3.9 ft at 13.3s W), a tie with PB north and short of the +0.05 drive margin. Head high on sets with offshore wind, so it is near your ceiling there too; only worth it if you want the drive and hike.
  NOTE

- Skip · 8:30–10:30a on the swampy high everywhere, Little Point (over its 5.5 ft tide ceiling all morning, then falling), Birdrock (W swell blocked), and the SW-wind afternoon after about 1p.
  SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Groomed pier-north sandbar at chest to head high is Anvil territory for speed. Sit a touch deeper on the sets and let the biggest, steepest ones go.

TW log · too much size and rip today

'IKE · ONE THING TO REMEMBER

Why mornings are offshore.

Overnight the land cools faster than the ocean, so cooler air drains downhill and out to sea as a light E breeze. Blowing into the wave face, it holds the lip up and grooms the surface, which makes waves cleaner but also steeper and hollower. As the sun heats the land, the flow flips onshore, which is why the clean window closes by late morning.

SKIP

The swampy high tide from about 8:30 to 10:30a everywhere. Little Point (over its 5.5 ft tide ceiling all morning, then falling). Birdrock (W swell blocked). The SW-wind afternoon after about 1p.

GOTCHAS

Size: SRF 3 to 5 ft with sets to 6 on mixed 210° and 280° swell, and the buoy groundswell is 3.0 to 3.9 ft at 13–14s, so the average waves are in your range but the sets are near your ceiling on the Anvil. Offshore wind holds the faces up, so the sets will feel steeper and pitch harder; let the biggest ones go. HIGH rip current risk (NWS SRF). The La Jolla gauge is still running about 1.2 ft over predictions, so the beach gets narrow and backwashy as the high fills. Blacks: hike, shorebreak, canyon crowds.
