DRAG ACROSS THE DAY

Drag the tide

DAWN-10A · W 15 MPH ONSHORE, SHOWERS, TIDE FILLING	10A-3P · FLOOD HIGH NEAR 6.2 FT REAL, W 10 MPH	3:30-4:45P · PB NORTH, WIND GOING N, TIDE DROPPING
SKIP	SKIP	ONLY IF YOU MUST

4:00p	***Only if you must: PB north, wind swinging N, tide dropping toward about 3 ft real, sit inside and let the sets go***	**1.8 ft tide**	**N ~9 kt · NWS**	**6–8 ft, sets to 10 south of Del Mar (SRF) · W 13–14s groundswell plus a 10s W windswell · well above your ceiling**

L 3.0 @ 3:50a · H 4.9 @ 10:44a · L 0.5 @ 7:02p · obs 4.7 @ 5:48a

A day to skip. If you need a session, PB north of the pier from about 3:30 to 4:45p on the Anvil, sitting inside, when the W wind backs off to N and the tide drops. Table tides: L 3.0 @ 3:50a, H 4.9 @ 10:44a, L 0.5 @ 7:02p. The gauge read 4.66 ft at 5:48a against about a 3.24 ft prediction, about 1.4 ft over the table, so the high lands near 6.2 ft real with a Coastal Flood Advisory 7a to 4p. LJAC1 ran W to WNW 12–15 kt gusting 17 through 4:00–5:00a. NWS hourly has W 15 mph 6–9a with showers (48%), NW 10 at 10a, W 10 11a–3p, N 10 at 4p, N 5 at 5p. PZZ740: W 10–15 kt gusts 20 today, variable under 10 kt tonight. Sunset about 4:45p.

Where it's working

Skip today · if you must, PB north of pier 3:30–4:45p

LOCAL and BEST (single hero), but this is a skip day. 46258 SwH 1.5–1.7 m (4.9–5.6 ft) at 13–14s W 266° with a 1.7–1.8 m (5.6–5.9 ft) windswell at 10s on top, Hs 2.3–2.5 m (7.5–8.2 ft). NWS SRF 6 to 8 ft with sets to 10 south of Del Mar, HIGH rips, High Surf Advisory through 10a Sunday, Coastal Flood Advisory 7a–4p. LJAC1 W to WNW 12–15 kt gusting 17 at dawn; NWS keeps W 10–15 mph until about 3p, then N 10 and NE 5 by dusk. Scorecard 0.82 now (wind flag only). Well above your comfort zone.

CALL

Blacks · beyond the fish

- Scorecard 0.72 now with a W 12 kt chop flag (46225 SwH 3.9 ft at 14s WSW), 0.82 by 4p as the wind swings N, a tie with LOCAL and short of the +0.05 drive margin. Overhead-plus at the canyon with heavy rips: thruster day, not today. NOTE

- Skip · the whole morning (W onshore, showers, flood high), Little Point (over its 5.5 ft real-tide ceiling most of the day), PB Point, Tourmaline and Birdrock (tide too high, then too big), and PB Drive (oversize). SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Only for a short inside paddle late in the day. It is far too loose for 6–10 ft sets, so stay well inside and let everything big go; this is a thruster-or-skip day.

TW log · way too much size, rip and flood surge

'IKE · ONE THING TO REMEMBER

Why a flood high plus big surf is extra dangerous.

The La Jolla gauge is running about 1.4 ft above the tide table because of the storm (low pressure lifts the sea and onshore wind piles water against the coast). Add that to a 4.9 ft high and big sets, and wave runup reaches much farther up the beach than normal. That is why NWS has a Coastal Flood Advisory today: the backwash gets strong, the sand gets narrow, and getting in and out through the shorebreak is the hardest part of the session.

SKIP

The whole morning (W 15 mph onshore and showers). The flood-advisory high near 6.2 ft real around 10:44a. Little Point (over its 5.5 ft real-tide ceiling). PB Point, Tourmaline and Birdrock (tide too high, then too big). PB Drive (oversize).

GOTCHAS

Size: SRF 6 to 8 ft with sets to 10 south of Del Mar, and the buoy has about 5 ft of 13–14s W groundswell plus 6 ft of 10s windswell (Hs 7.5 ft), so this is well past your ceiling on the Anvil. HIGH rip current risk, High Surf Advisory through 10a Sunday, Coastal Flood Advisory 7a–4p (NWS): expect water over low beach spots near the high and strong surges up the sand. Friday and Saturday rain keeps the county 72-hour runoff rule on, so stay away from river mouths and storm drains.
