TODAY'S CALL

GERRY BOT COWABUNGA REPORT · WED OCT 28 · NORTH PB

A little more SSW groundswell, light offshore under the clouds, and the W wind fills in after lunch. PB Drive at first light, seven till half past nine.

Small SSW, offshore early: paddle out by 7:00

GAME PLAN · MAKE THE MOST OF IT

PB Drive

WINDOW	7–9:30a · Anvil twin · ~73°F
SURF	1–3 ft, sets 4 (SRF), SSW/SW 13–14s + W 5–6s windswell
TIDE	L 2.0 @ 4:01a H 6.5 @ 10:26a L -0.8 @ 5:51p obs 4.0 @ 5:48a

Read the gauge, not just the tide table.

L 2.0 @ 4:01a · H 6.5 @ 10:26a · L -0.8 @ 5:51p · obs 4.0 @ 5:48a

PB Drive, 7 to about 9:30a, on the Anvil twin. Table tides: L 2.0 @ 4:01a, H 6.5 @ 10:26a, L –0.8 @ 5:51p. The gauge read 4.03 ft at 5:48a, about 1.2 ft over the table, and the SRF says tides are running 1.4–1.6 ft high. LJAC1 was E 9–11 kt around 5:00–5:18a. NWS hourly has E 5 mph 5–9a, SE then SW 5 mph 10–11a, W 5 mph noon–1p and W 10 mph 2–5p, mostly cloudy then sunny. PZZ740 has wind variable under 10 kt, becoming SW 10 kt this afternoon.

Where it's working

★

PB Drive

Scorecard 1.00, top of the local list. The groundswell is a touch stronger than yesterday, SwH 0.6–0.7 m (2.0–2.3 ft) at 13–14 seconds out of the SSW to SW, with a 5–7 second W windswell on top (46258). LJAC1 is E 9–11 kt offshore at 5a, and NWS has E 5 mph through 9a under clouds. The SRF calls it 1–3 ft with sets to 4. The 6.5 ft high at 10:26a runs about 7.7 ft on the gauge, so it gets fat after about 9:30. Paddle out by 7.

CALL

2

Little Point

Score 0.83, flagged undersized for the reef. The gauge read 4.03 ft at 5:48a, about 1.2 ft over the table, so the reef sits over the 5.5 ft ceiling until about 1:15p and drains toward 3 ft around 2:45p. NWS has W 5 mph at 1p and W 10 mph from 2p, so it is only a maybe around 1:15–2p.

MAYBE

3

Tourmaline

Score 0.82, but it goes slow and soft on a tide this full. Fine for a mellow paddle if the Drive is packed.

SOFT

4

PB north of the pier

Score 0.70. Same small swell with less shape than the Drive.

SOFT

•

Skip · Calumet (0.72) and PB Point (0.44) are swamped on this high. The Cliffs and OB would take the SW angle, but 2 ft of groundswell is not worth the drive. Blacks and Scripps (extended only) are not worth it either.

SKIP

BOARD

Anvil twin

~73°F

QUIVER

Anvil twin fish

Soft waist-high sandbar faces on a very full tide. The twin keeps speed through the fat sections.

TW log · fine if it is closer to waist and slow

'IKE · ONE THING TO REMEMBER

Read the gauge, not just the tide table.

Tide tables only know the moon and sun. This week the real water is running 1.2 to 1.6 ft higher than the table, from warm water and the season. Check the live La Jolla gauge before a reef session, because a reef that works at 4 ft on paper can be swamped when the sea is really sitting at 5 ft.

SKIP

Little Point before about 1:15p, while the gauge-adjusted tide sits over the 5.5 ft ceiling. Calumet and PB Point on a tide this full. The Cliffs and OB on 2 ft of groundswell. Anything after about 2p, once it goes W 10 mph.

GOTCHAS

Low rip current risk (NWS SRF). The coastal flood warning runs through 1p Thursday, and the high near 7.7 ft on the gauge will wet beach access and the PB boardwalk around 10:26a. The 14 second sets come in small groups with long lulls, so be patient.
