L 2.4 @ 4:38a · H 6.3 @ 11:11a · L -0.6 @ 6:53p · obs 4.1 @ 5:54a

PB Drive, 7 to about 9:15a, on the Anvil twin. Table tides: L 2.4 @ 4:38a, H 6.3 @ 11:11a, L –0.6 @ 6:53p. The gauge read 4.08 ft at 5:54a, about 1.3 ft over the table. LJAC1 was E 4–5 kt (gust 6) around 5:00–5:18a. NWS hourly has E 5 mph 6–8a, SE 5 mph at 9a, S 5 mph 10–11a, then S to SW 10 mph noon–4p, partly sunny. PZZ740 has wind variable under 10 kt, becoming SW 10 kt this afternoon.

Where it's working

★

PB Drive

Scorecard 0.94, top of the local list. The groundswell is longer period today, SwH 0.6–0.8 m (2.0–2.6 ft) at 15–17 seconds out of the SW (46258), with a small W windswell on top. LJAC1 is E 4–5 kt offshore at 5a, and NWS has E 5 mph through 8a, SE at 9a. The SRF calls it 1–3 ft with sets to 4. The gauge is running about 1.3 ft over the table, so the 6.3 ft high at 11:11a is really near 7.6 ft and it goes fat after about 9:15. Paddle out by 7.

CALL

2

Little Point

Score 0.81, flagged undersized for the reef. With the gauge offset the reef sits over the 5.5 ft ceiling from about 8a until about 2p, and by the time it drains toward 3 ft (around 4p) NWS has S to SW 10 mph onshore. Skip today.

SKIP

3

Tourmaline

Score 0.80. Soft and slow on a filling tide, but fine for a mellow paddle if the Drive is crowded.

SOFT

4

PB north of the pier

Score 0.69. Same small swell with less shape than the Drive.

SOFT

•

Skip · Calumet (0.70) and PB Point (0.42) are swamped on this high. The Cliffs and OB would take the SW angle, but 2 to 2.6 ft of groundswell is not worth the drive. Blacks and Scripps (extended only) are not worth it either.

SKIP

BOARD

Anvil twin

~73°F

QUIVER

Anvil twin fish

Soft waist to chest sandbar faces on a filling tide. The twin keeps speed through the fat sections between long period sets.

TW log · fine if it is closer to waist and slow

'IKE · ONE THING TO REMEMBER

Long period means patience.

At 15 to 17 seconds the swell travels in tight groups with long gaps between them. The buoy says only 2 ft, but each set carries more energy than the number suggests and shows up bigger on the sandbar. Count the sets from the beach before you paddle, and sit where the last one broke rather than chasing the lull.

SKIP

Little Point today: drowned by the gauge-adjusted high until about 2p, then onshore SW 10 mph as it drains. Calumet and PB Point on a tide this full. The Cliffs and OB on 2 ft of groundswell. Anything after noon, once the S to SW wind fills.

GOTCHAS

Low rip current risk (NWS SRF). The coastal flood warning runs through 1p today, then a coastal flood advisory from 1p today to 2p Friday, so the 11:11a high (near 7.6 ft on the gauge) will wet beach access and the PB boardwalk. The 15 to 17 second sets come in small groups with long lulls, so be patient.
