WEEKLY

TODAY'S CALL

AL'S COWABUNGA · SAT OCT 10 · NORTH PB

Twenty-second SSW is in. PB Drive, 9:30 to 11:30.

also fine: *Calumet after 10:30*

WHAT'S IN THE WATER

GROUND SwH 4.3 ft · 20s
 WINDSWELL WWH 3.0 ft · 10s
 HS BUOY Hs 5.2 ft · 46258

Buoy 46258 spectrum · ground 4.3 ft @ 20s SSW + WWH 3.0 ft @ 10s · face 3-5 ft, sets 6 (NWS SRF SD) · PZZ740 SW 3 ft @ 16s + W 2 ft @ 5s · MWD 194° SSW · variable <10 kt becoming W 10 kt afternoon

BOARD

Inferno 72

~72°F

QUIVER

Sharp Eye Inferno 72 Chest-to-head sets on a 20s SSW groundswell with light wind. Enough punch for the shortboard once the tide drains.

Anvil twin · if it stays fat and closeout-y

TW log · soft leftovers only

HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point

NOT Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

Long period wants room to draw up.

A 20-second groundswell organizes from way outside, but on a flood high the bars are buried and the wave dumps late or closes out. Waiting an hour or two after the high lets the sandbars come back into play so that period energy can actually stand up instead of jacking and dying.

WHERE IT'S WORKING

PB Drive

The call. Ultra-long 20s SSW groundswell (SwH 4.3 ft @ 20s at 46258) with NWS 3 to 5 ft, sets to 6 on mixed S 210° / W 280°. Score 0.73 — top LOCAL sandbar once LP is tossed. PB north drops to 0.54 today (long-period closeout risk on this SSW angle); Drive still takes the energy once the 9:18a flood high drains. Go 9:30 to 11:30 while wind stays ~4 kt.

CALL

Calumet

Also fine after about 10:30 once the tide drops off the reef. Score 0.71 — the 20s SSW loves this corner, but morning is too full (tide-high flag). Soft pass until the drain.

ALT

PB north of the pier

Score 0.54 with a hard long-period closeout flag. Yesterday's SW 232° @ 15s suited the pier wedge; today's SSW 194° @ 20s is a different animal. Soft pass.

SOFT

Little Point

Score 0.92 on paper and the 20s SSW is textbook — but Kelly overrides. Gauge already read 5.4 ft at 6:42a (running well over the table under a Coastal Flood Warning), so we're at/over the 5.5 ft LP ceiling before the 9:18a high. After that it falls all day to L 0.0@3:49p — never ride LP through a low. The 3 ft refill is around 7:30-8p, after the 6:23p sunset. Skip.

SKIP

Tourmaline

SOFT

Score 0.48. High-tide mush through the morning, high rips, and the flood anomaly makes it worse.

Skip · PB Point is too full (0.44). The Cliffs want a cleaner W and a rising low-to-mid; this fat SSW flood gives them little. OB Pier wants low-to-mid too. Scripps and Blacks aren't local, and nothing there beats Drive on this tide. Sunday's Rachel leftovers (seas 7-9) are the skip day — not today.

SKIP

Go 9:30a through 11:30a at PB Drive. The table has H 5.9@9:18a, and the gauge already read 5.4 ft at 6:42a — still running over the table under a Coastal Flood Warning through 3p Sunday. Let it drain: it falls to L 0.0@3:49p, then refills toward H 4.7@9:55p. LJAC1 NNE ~5 kt @ 6:00-6:18a PT. NWS hourly has light N/NW/W ~4 kt through noon, then W/NW ~9 kt with a slight chance of showers afternoon. Cloudy to mostly cloudy. Sunrise 6:48a, sunset 6:23p. Get it today: Tropical Storm Rachel leftovers hit tonight into Sunday (PZZ740 seas 7-9 ft, Beach Hazards Statement Sun).

SKIP

Anything before about 9:30 while the tide is flooded. Little Point all day — already at the ceiling on the flood anomaly, then falling through the low, and the 3 ft evening fill is after sunset. PB north on this 20s SSW (closeout risk). Calumet and Tourmo while it's this full. The Cliffs and OB on a flood high. Everything from early afternoon once wind and shower chances fill in. Anything after dark. Sunday entirely.

GOTCHAS

High rip current risk today (NWS), with sets to 6 ft — watch the sandbar holes at Drive. Coastal Flood Warning through 3p Sunday: tide is over the table, so the high may reach the stairs and seawall, and the first hour after it will be fat and backwashy. Coastal Flood Advisory from 3p Sunday through 2p Tuesday. Beach Hazards Statement Sunday 6a-10p (surf 5-7, local sets to 9). Tropical Storm Watch / Rachel local statement for SW California — peak impacts Sunday. Flood Watch late tonight through Sunday evening for rainfall. Slight chance of showers this afternoon, then more likely overnight. Bring a towel you do not mind getting wet on the walk back.
