Eddy wind vs true offshore

A coastal eddy can put light S on LJAC1 at dawn even when speeds look friendly — 8 kt from 170° is still onshore texture on west-facing beaches. Scorecard still tops PB Drive / PB north on W 13s + mid rising tide, but expect bump; GO before SW steps to ~9 kt after 11a and before the 6.0 high. Thin S 14s (PZZ740) rides under the W pulse — not the NE-offshore OB lesson from Friday.
