TODAY'S CALL

GERRY BOT COWABUNGA REPORT · WED OCT 14 · NORTH PB

Offshore again, a bit smaller. Little Point, out by 8:45.

round two of the S swell: ***paddle out by 7:30***

WHAT'S IN THE WATER

GROUND	SwH 3.9 ft · 15s	
WINDSWELL	WWH 2.6 ft · 8s	
HS BUOY	Hs 4.6 ft · 46258	

Buoy 46258 spectrum · ground 3.9 ft @ 15s SSW (15–17s overnight) + WWH 2.6 ft @ 8s W · face 3–5 ft, sets 6 (NWS SRF SD) · PZZ740 S 3 ft @ 16s + W 1 ft @ 15s · MWD 208° SSW · wind E ~6 kt

BOARD

Inferno 72 ~70°F

QUIVER

Sharp Eye Inferno 72 Clean 15-second groundswell on a steep reef left with offshore wind. Still Inferno territory, even a foot smaller than Tuesday.

Anvil twin · only if you end up on the Drive sandbar

TW log · too much push for it today

HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point

NOT Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

Period is power.

Wave energy grows with height squared times period, so 4 ft at 15 seconds carries about twice the push of 4 ft at 8 seconds. Long-period swell also feels the bottom sooner and stacks up on the reef. That is why the buoy number dropped a foot since Tuesday, but Little Point will still stand up chest to overhead on the sets.

WHERE IT'S WORKING

★ **Little Point** CALL

Perfect 1.00 on the scorecard. SSW groundswell (46258 SwH 3.9 ft @ 15s, 202–208°) is right in its window, the pier anemometer has E 6–11 kt offshore since 6a, and the tide is rising through the middle. The gauge read 4.1 ft at 6:54a, about 0.9 ft over the table, so it reaches the 5.5 ft ceiling around 8:45a. Paddle out by 7:30.

2 **PB Drive** ALSO

Score 0.95. Also fine at dawn on the same offshore if Little Point is packed. Softer sandbar peaks, and sets to 6 ft will close out some.

3 **PB north of the pier** SOFT

Score 0.73. The SSW angle mostly misses the pier wedge, so it is smaller and less organized than Drive.

4 **Calumet** SOFT

Score 0.71. Good swell angle, but it wants less water than this flooding high. Pass.

5 **Tourmaline** SOFT

Score 0.68. Too full for the cobble on this high, and the E wind is outside its offshore cone. Pass.

- Skip · PB Point (0.44) is too full. The Cliffs (Garbage, Abs, Luscomb's) want W groundswell and a low to mid tide, and today is SSW on a flooding high, so none of them beat Little Point. OB is the same story. Scripps and Blacks are extended only and do not top a local reef on offshore SSW.

SKIP

DRAG THE TIDE

7:00a 3.3 ft tide E ~4 kt · NWS **GO · Little Point** 3–5 ft, sets 6 (SRF)

PRE-7A · FIRST LIGHT	7–8:45A · LITTLE POINT	9A–NOON FLOOD	NOON ON · W/NW ONSHORE
WAIT	GO	SKIP	SKIP

L 2.4 @ 4:30a · H 5.4 @ 10:59a · L 0.5 @ 6:36p · obs 4.1 @ 6:54a

Little Point, 7 to about 8:45a, on the Inferno 72. The table has L 2.4@4:30a rising to H 5.4@10:59a, but the gauge read 4.13 ft at 6:54a against about 3.3 predicted, so it is still running roughly 0.9 ft over the table. That puts the reef past its 5.5 ft ceiling around 8:45a, and the real high could reach about 6.3 ft. The NOAA pier anemometer (LJAC1 wind is out today) had E 7–11 kt from 5:24 to 6:36a, easing to E 4–6 kt by 6:54a. NWS hourly holds E 5 mph (~4 kt) through 8a, calm 9 to 10a, W 5 mph at 11a, then W/NW 10 mph (~9 kt) from noon. No good afternoon backup: the tide drains to L 0.5@6:36p, after sunset, with onshore NW the whole way. Sunrise 6:51a, sunset 6:18p.

SKIP

Little Point after about 8:45a, when the high tide goes over its ceiling, and again in the afternoon when it drains with onshore NW. Everything from 9a to noon while it is flooded. Calumet, Tourmo, and PB Point on this high. The Cliffs and OB on a SSW swell. Anything after noon once W/NW ~9 kt fills in.

GOTCHAS

Little Point is a shallow reef with a tight takeoff, so it crowds fast and the rocks show as it drains. High rip current risk today and a Beach Hazards Statement through 2p Thursday (NWS). Sets to 6 ft with 15–17s period mean long lulls, then a big set. A Heat Advisory starts 10a Thursday, so bring water for the stairs at Fern Glen.
