TODAY'S CALL

GERRY BOT COWABUNGA REPORT · THU NOV 5 · NORTH PB

The west swell backed off a notch but still runs head high on sets, so paddle out at Tourmaline around nine thirty as the very full tide drops. It stays glassy to

GAME PLAN · MAKE THE MOST OF IT

Tourmaline

WINDOW	9:30a–noon · Anvil twin · ~75°F
SURF	3–5 ft (SRF), W 14s groundswell with a smaller 2 ft wind chop, sets head high on the open beach
TIDE	H 5.4 @ 6:23a L 0.6 @ 12:47p H 4.4 @ 6:42p obs 6.8 @ 5:48a

Why the tide runs high.

light west wind until about noon.

Glassy west swell: Tourmaline, the soft option

DRAG ACROSS THE DAY

Drag the tide

6–9A · GLASSY BUT A VERY FULL TIDE, SWAMPY	9:30A–NOON · TOURMALINE, GLASSY TO LIGHT W, TIDE DROPPING	1P–DARK · W 10 MPH ONSHORE, CHOPPY
MEH	GO	SKIP

10:00a	Tourmaline, glassy to light W, tide dropping through mid	2.5 ft tide	W ~4 kt · NWS	3–5 ft (SRF), W 14s groundswell with a smaller 2 ft wind chop, sets head high on the open beach

H 5.4 @ 6:23a · L 0.6 @ 12:47p · H 4.4 @ 6:42p · obs 6.8 @ 5:48a

Tourmaline from about 9:30a to noon on the Anvil twin. Table tides: H 5.4 @ 6:23a, L 0.6 @ 12:47p, H 4.4 @ 6:42p. The gauge read 6.8 ft at 5:48a, about 1.3 ft over the table, so the noon low only reaches about 2 ft real. LJAC1 was ENE 5 kt at 5:18a. NWS hourly has NE 5 mph to 7a, calm at 8–9a, W 5 mph from 10a to noon and W 10 mph from 1p. PZZ740 calls variable wind under 10 kt becoming W 10 kt this afternoon.

Where it's working

Tourmaline · 9:30a–noon

A notch smaller than yesterday: 46258 SwH 1.0–1.2 m (3.3–3.9 ft) at 13–14 seconds from the W, right at your ceiling, with a W wind sea around 3 ft riding on top. The open beach will still throw head-high closeouts on sets. Tourmaline is the softer, rolling wave, and it gets going once the very full 6:23a high (gauge 6.8 ft at 5:48a, about 1.3 ft over the table) drains toward the 12:47p low. NWS has calm wind at 8–9a and only W 5 mph from 10a to noon, so it stays clean. Scorecard forecast at 10a: Tourmaline 0.86.

CALL

Also fine · PB north of pier, 9:30–11:30a

Top raw score (0.96 live, 0.98 at 10a), and closer to your size than yesterday, but the W sets still close out head high there. Go if you are feeling it.

ALSO OK

Blacks (extended) · overhead sets, beyond the fish

Live 0.95 on 46225 (SwH 3.9 ft at 14s W), no better than PB north, and the canyon turns that into overhead sets. Save it for Sunday.

BEYOND

Skip · anything before about 9a on the swampy high tide, Little Point (drowned, then falling), PB Point and Calumet on this tide, and everything once W 10 mph fills in around 1p.

SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Soft glassy Tourmaline walls are Anvil territory. The head-high W closeouts at the open beach or the overhead Blacks sets want a shortboard you do not own yet.

TW log · fine for the inside reforms, but too much size on the sets today

'IKE · ONE THING TO REMEMBER

Why the tide runs high.

The tide table only knows the moon and sun. Real water also rises with warm water, low air pressure and onshore setup, and right now La Jolla is reading over a foot above the table. Add the table highs climbing to about 6 ft by the weekend and the real morning highs land past 7 ft, which swamps the sandbars. So time sessions off the live gauge, and wait for the drop.

SKIP

The swampy early high tide everywhere. The open beach closeouts if head-high sets bother you. Little Point (drowned early, falling later). Blacks on the Anvil. Everything once W 10 mph fills in around 1p.

GOTCHAS

Size: SRF 3 to 5 ft with 14 second W sets, so expect lulls then sets bigger than the average. Sit wide and be patient. King-tide pattern: the La Jolla gauge is running 1.3 to 1.6 ft over predictions and NWS has a coastal flood advisory from 4a Friday, so the beach is narrow and backwashy near the high. Tourmaline crowd: packed with longboards, watch for loose boards. High rip current risk (NWS SRF).
