'IKE · ONE THING TO REMEMBER
Windsea is not groundswell.
When Hs looks big but SwH is thin and WWH owns the spectrum at six seconds, the ocean is mostly short-period chop. That energy does not organize into clean walls. Wait for the wind to lay down before chasing the size on the buoy.

WHERE IT'S WORKING

★ **Skip · home stretch** SKIP
The call is no call. LJAC1 already SW 15 kt @ 6:00a, NWS holds SW 15–20 mph with rain showers through the day, and 46258 is windsea-dominated (Hs 7.5 / SwH 3.9 / WWH 6.6 @ 6s). NWS SRF 5–8 ft with high rips. Scorecard tops out at LP 0.63 / Drive 0.45 — both flagged strong onshore + thin groundswell. Sleep in.

2 **PB Drive (if forced)** SOFT
Least-bad LOCAL sandbar on paper (0.45) for a short peek into mushy windsea — but long-period closeout risk + onshore. Only if you need salt air; Anvil twin. Not a session.

3 **Little Point** SKIP
Score 0.63 on paper and tide is rising (prefer tag) — Gerry Bot overrides. Thin groundswell (SwH/Hs 3.9/7.5), strong onshore, already 5.0 ft rising to H 6.0@9:43a (over the 5.5 ft LP ceiling). Then falls all day to L -0.1@4:27p — never ride LP through a low. Evening 3 ft fill is after the ~6:22p sunset. Skip.

4 **Calumet · Tourmo · PB north · PB Point** SKIP
All flagged strong onshore/cross. Calumet 0.42 and Tourmo 0.26 also tide-high mush. PB north 0.34 and PB Point 0.16. Nothing here beats a rest day.

• **Skip · Cliffs want cleaner W and lighter wind; OB is worse onshore. Scripps and Blacks are not local and do not beat a dry towel today. Tuesday (NE→W 10 kt, SW 3 ft @ 16s) is the first real clean-up window — flip Weekly.** SKIP

Everything LOCAL today. Little Point (thin GS + onshore + over the 5.5 ft ceiling, then falling through a zero low). Drive / PB north / Tourmo / Calumet / PB Point under 15 kt SW. Cliffs and OB. Anything after dark. Rain-runoff water quality after the morning showers.

GOTCHAS

High rip current risk (NWS) with SRF 5–8 ft. Beach Hazards Statement 6a–10p Sun (surf 5–7, local sets to 9). Coastal Flood Warning through 3p today; Coastal Flood Advisory 3p Sun through 2p Tue. Small Craft Advisory through this evening (PZZ740). Showers mainly this morning — check SD County beach water quality before any paddle. Windsea Hs 7.5 with only SwH 3.9 of real groundswell: it looks bigger than it rides.
