L 1.7 @ 3:28a · H 6.6 @ 9:47a · L -0.8 @ 4:57p · H 3.8 @ 11:23p · obs 4.3 @ 5:42a

PB Drive, 7 to about 9:30a, on the Anvil twin. Table tides: H 6.6 @ 9:47a, L –0.8 @ 4:57p, H 3.8 @ 11:23p. The gauge read 4.26 ft at 5:42a, about 1.3 ft over the table, and the SRF says tides are running 1.5–1.7 ft high. LJAC1 was E 8–10 kt around 4:42–5:00a. NWS hourly has E 5 mph 6–8a, calm 9–10a, W 5 mph 11a–noon and W 10 mph 1–4p, patchy fog then sunny. PZZ740 has wind variable under 10 kt, becoming W 10 kt this afternoon.

Where it's working

★

PB Drive

Scorecard 0.84, top of the local list. The groundswell is still small, SwH 0.4–0.6 m (1.3–2.0 ft) at 13–14 seconds out of the SW to WSW, with a 5–6 second W windswell on top (46258). LJAC1 is E 9 kt offshore at 5a, and NWS has E 5 mph through 8a, then calm 9–10a under patchy fog. The SRF calls it 1–3 ft with sets to 4. The 6.6 ft high at 9:47a runs about 7.9 ft on the gauge, so it gets fat near the top of the tide. Paddle out by 7.

CALL

2

Little Point

Score 0.80, flagged undersized for the reef. The gauge read 4.26 ft at 5:42a, about 1.3 ft over the table, so the reef sits over the 5.5 ft ceiling until about 12:30p and drains to 3 ft around 2p. NWS has W 5 mph at noon and W 10 mph from 1p, so it is only a maybe.

MAYBE

3

PB north of the pier

Score 0.80, but it is the same small swell with less shape than the Drive on a tide this full.

SOFT

4

Calumet

Score 0.67. The tide is far too full for its window. Pass.

SOFT

•

Skip · Tourmaline (0.77) goes slow on the high, and PB Point (0.40) has the wrong angle. The Cliffs and OB would like the WSW angle, but the W energy is mostly a 5 second windswell. Blacks and Scripps (extended only) are not worth the drive on 2 ft of groundswell.

SKIP

BOARD

Anvil twin

~73°F

QUIVER

Anvil twin fish

Soft waist-high sandbar faces on a very full tide. The twin keeps speed through the fat sections.

TW log · fine if it is closer to waist and slow

'IKE · ONE THING TO REMEMBER

Rain is coming, so remember the 72 hour rule.

Showers are in the forecast from Friday. Rain washes street runoff into the ocean, and San Diego County advises staying out of the water for 72 hours after rain, especially near river mouths, storm drains and lagoon outlets. Bank your sessions before the weekend.

SKIP

Little Point before about 12:30p, while the gauge-adjusted tide sits over the 5.5 ft ceiling. Calumet, Tourmo and PB Point on a tide this full. The Cliffs and OB on a short W windswell. Anything after about 1:30p, once it goes W 10 mph.

GOTCHAS

Low rip current risk (NWS SRF). The coastal flood warning runs through 1p Thursday, and the high near 7.9 ft on the gauge will wet beach access and the PB boardwalk around 9:47a. Patchy fog at dawn, so keep an eye out for other surfers. The 14 second sets come in small groups with long lulls.
