HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point

NOT Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

Long period, small energy.

A 14s SW looks fancy on the scorecard, but SwH is only ~2.3 ft and the tide is already falling toward a mid-morning low — the sandbars beat the reef drive.

WHERE IT'S WORKING

PB north of pier

The call. Real east wind (~11 kt offshore), mid-high obs tide (4.9), and 14s SW ground on the sandbars. Score 0.87 — go before the west turn and the 10:45a low softens it.

CALL

2

PB Drive

Also fine — same 0.87 on the home stretch. Same window.

ALT

3

Tourmaline

Score 0.68 — tide high vs window and wind not its offshore cone. Crowded if you go.

SOFT

4

Calumet

Score 0.63 — SW angle is in, but tide is high for its window (obs 4.9) and wind not offshore for Birdrock.

SOFT

5

Little Point

Scorecard 1.00 loves the 14s SW + E wind, but we're falling toward L 3.1@10:45a (never CALL LP through a low) and ground is only ~2.3 ft. Skip the drive.

SKIP

- Skip · PB Point is undersize on this SW (0.28). Cliffs aren't clearer than PB on small energy. OB Pier wants northeast offshore plus a thicker SW — not this. Evening high is ~4:41p but west-NW wind, and after dark the tide dumps (sunset ~6:31p). Scripps and Blacks aren't local.

Go now through 10:30a. Morning high H 3.8@6:40a then a soft mid-morning low L 3.1@10:45a, then rise to H 5.2@4:41p. Observed 4.9 ft @ 6:42a (~+1.1 vs the table). LJAC1 E 100° 11 kt @ 6:00a PT. NWS grid E ~4 kt early, calm mid-morning, W ~4 kt by 11a-noon, W-NW ~9 kt mid-afternoon. Under 3 ft by dusk, and the evening dump is after dark (sunset ~6:31p), so no evening call.

SKIP

Little Point through the mid-morning low (and only 2.3 ft ground). PB Point on this SW. Calumet/Tourmo once the tide is this high. Cliffs aren't clearer. OB Pier isn't the northeast-offshore recipe. West-NW wind after noon. Anything after dark.

GOTCHAS

Rip risk is low (NWS). Tide is running about +1.1 versus the table. East wind is real (~11 kt) early — good offshore, but it can get punchy. West seabreeze by late morning. Pier crowd. Hot inland (air ~85°F at the beach early) — fog not the story.
