WEEKLY

TODAY'S CALL

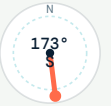

AL'S COWABUNGA · THU OCT 8 · NORTH PB

South swell filled in. PB north of the pier, 9:30 to 11:30.

also fine: *PB Drive after 10:30*

WHAT'S IN THE WATER

GROUND  SwH 3.6 ft · 12s
 WINDSWELL  WWH 3.0 ft · 10s
 HS BUOY  Hs 4.6 ft · 46258
 Buoy 46258 spectrum · ground 3.6 ft @ 11.8s S + WWH 3.0 ft @ 9.9s S · face 3-5 ft, sets 6 (NWS SRF SD) · PZZ740 S 3 ft @ 12s + W 1 ft @ 11s · MWD 173° S · variable
 <10 kt becoming NW 10 kt afternoon

BOARD

Inferno 72

~71°F

QUIVER

Sharp Eye Inferno 72 Chest-to-head sets on a 12s S swell with light wind. There's enough push for the shortboard once the tide drains.

Anvil twin · if it stays fat and backwashy

TW log · LP sunset if it's soft

HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point**NOT** Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

A big tide over the table eats the shape.

When the water runs more than a foot above the predicted tide, waves break later and closer to shore, and the backwash off the steep beach runs into the next set. Waiting an hour or two after the high lets the sandbars come back into play.

WHERE IT'S WORKING

PB north of the pier

★ The call. The south swell filled in overnight (3.6 ft at 12s at the buoy, up from 3.0 yesterday) and NWS has 3 to 5 ft with sets to 6. The tide is way over the table again, so this is the stretch that handles a fat tide best, and the pier gives the S energy something to wedge off. Go 9:30 to 11:30 as the 8:28a high drains, before NW ~9 kt fills in around 11. Score 0.71, top of the board.

CALL

2 PB Drive

Also fine once the tide drops a bit, from about 10:30. It likes S swell, but it's too full right now (0.59).

ALT

3 Calumet

Score 0.63. The S angle suits the reef, but the tide is way too full until noon, which is when the NW wind shows up.

SOFT

Little Point

★ Score 0.54. Morning is a no: the tide falls all day to the 2:31p low, and we never ride LP through a low. Sunset maybe: the refill passes 3 ft around 4:30 to 5:30p, so 5 to 6:15 could work if the NW backs off to ~4 kt like NWS says. The 11.8s period is just under its 12s minimum, so keep expectations modest.

PM?

5 Tourmaline

Score 0.46. High-tide mush through the morning, and the rips are high today.

SOFT

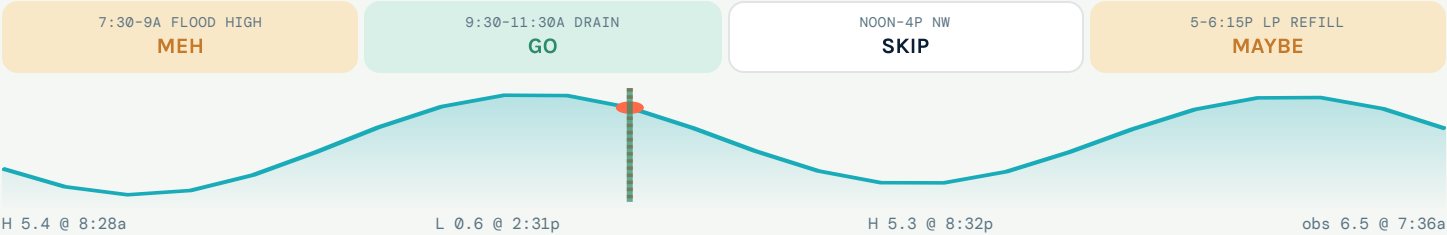

Skip · PB Point is too full on this tide (0.50). The Cliffs (Garbage, Abs, Luscomb's) want a W swell and a rising low-to-mid tide, and this S swell on a flood high gives them nothing. OB Pier wants low-to-mid too. Scripps and Blacks aren't local, and nothing

SKIP

there beats PB on a S swell.

DRAG THE TIDE

10:00a 4.7 ft tide NW ~4 kt · NWS **GO** 3-5 ft, sets 6 (SRF)

Go 9:30a through 11:30a at PB north of the pier. The table has H 5.4@8:28a, but the gauge already read 6.5 ft at 7:36a, about +1.4 ft over the table. That's why the Coastal Flood Advisory is still up. Let it drain: it falls to L 0.6@2:31p, then refills toward H 5.3@8:32p. LJAC1 NE ~2 kt @ 6:54a PT, calm by 7a (glass). NWS hourly has NW ~4 kt 8-10a, NW ~9 kt 11a-5p, and NW ~4 kt from 6p. Patchy fog until about 10. Sunrise 6:47a, sunset 6:26p. Friday looks similar: NWS SRF 3-5 ft with sets to 6 on a S swell from 200°.

SKIP

Anything before about 9:30 while the tide is flooded. Little Point in the morning, since the tide falls all day. Calumet, Tourmo, and PB Point while it's this full. The Cliffs and OB on a flood high. Everything from noon to 4p once the NW fills in. Anything after dark.

GOTCHAS

High rip current risk today and Friday (NWS), with sets to 6 ft, so watch the pier pilings and the rips running out along them. Coastal Flood Advisory through 2p next Tuesday: the tide is running about +1.4 ft over the table, so the high may reach the stairs and seawall, and the first hour after it will be fat and backwashy. Beach Hazards Statement through 11p Fri. Extreme Heat Warning through 8p tonight, with NWS calling about 80°F at the beach, so bring water and sunscreen. Expect a pier crowd.
