WEEKLY

TODAY'S CALL

AL'S COWABUNGA · WED OCT 7 · NORTH PB

Soft south swell. PB Drive, 8:30 to 11:30.

also fine: *PB north of the pier*

WHAT'S IN THE WATER

GROUND		SwH 3.0 ft · 12s
WINDSWELL		WWH 2.3 ft · 10s
HS BUOY		Hs 3.9 ft · 46258

Buoy 46258 spectrum · ground 3.0 ft @ 11.8s S + WWH 2.3 ft @ 9.9s SSE · face 2-4 ft (NWS SRF SD) · PZZ740 W 2 ft @ 5s + S 3 ft @ 12s · MWD 183° S · variable <10 kt becoming NW 10 kt afternoon

BOARD

Anvil twin

~71°F

QUIVER

Anvil twin fish Soft S swell on a fat, draining tide. The twin keeps speed through the flat sections.

Inferno 72 · Thursday's 3-5 ft might be its day TW wings · if the flood high keeps it mushy

HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point

NOT Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

South swells have to turn the corner.

Our beach faces west-southwest, so a swell from due south (183° today) has to bend toward shore to reach it. Bending spreads the energy out, so 3 ft at the buoy shows up smaller and softer on the sand. Stretches that face a bit more south catch more of it.

WHERE IT'S WORKING

PB Drive

The call. A due-south 12s swell (3.0 ft at the buoy) has to bend into our beach, so it reads smaller and softer on the sand. Drive is the stretch that likes S-SW best. Wait for the flooded 8a high to drain, then go 8:30 to 11:30 in near-glass before the NW fills in around noon. Score 0.70.

CALL

2

PB north of the pier

Also fine. Scorecard 0.72, basically tied, and it handles the fat tide a little better. Same window.

ALT

3

Calumet

Score 0.63. The S angle suits the reef better than the sand, but the tide is way too full for it until about noon, which is exactly when the NW ~9 kt shows up.

SOFT

4

Little Point

Score 0.59. Morning is a no: the tide falls all day from the flood high to the 1:49p low, and we never ride LP through a low. Sunset maybe: the refill passes 3 ft around 3-4p and climbs toward the 7:46p high, so 4:30 to 6:15 could be fun on this S swell if the NW backs down to ~4 kt like NWS says.

PM?

5

Tourmaline

Score 0.46. High-tide mush until late morning. Longboard only if you must.

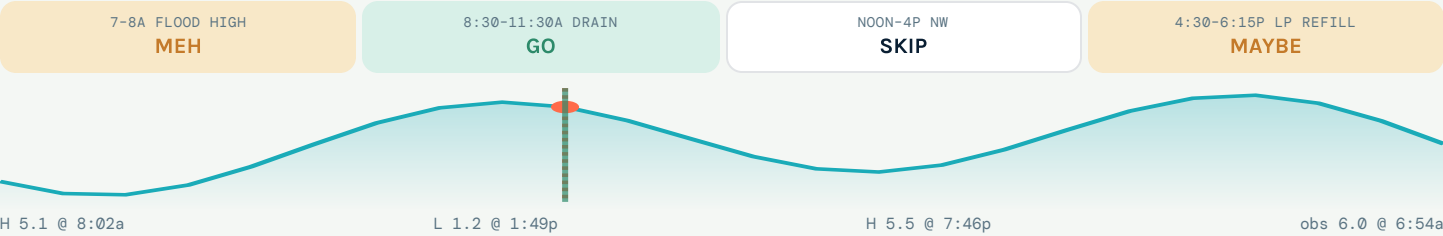

SOFT

Skip · PB Point is undersize and thin on this S swell (0.33). The Cliffs (Garbage, Abs, Luscomb's) all like a rising low-to-mid tide and W swell, and this flood high swallows their beaches; the afternoon low comes with NW wind. OB Pier wants a low-to-mid tide too. Scripps and Blacks aren't local, and nothing there beats PB on a S swell.

SKIP

DRAG THE TIDE

9:00a 4.8 ft tide NW ~4 kt · NWS **GO** 2-4 ft (SRF)

Go 8:30a through 11:30a at PB Drive. The morning high is H 5.1@8:02a on the table, but the gauge already read 6.0 ft at 6:54a, about +1.3 ft over the table. That's why there's a Coastal Flood Advisory. Let it drain: it falls to L 1.2@1:49p, then refills toward H 5.5@7:46p. LJAC1 NNE ~1 kt @ 6:18a PT (glass). NWS hourly has calm 7-8a, NW ~4 kt 9-11a, NW ~9 kt noon-4p, and NW ~4 kt 5-6p. Patchy fog early. Sunrise 6:46a, sunset 6:27p. Thursday looks bigger: NWS SRF says 3-5 ft with sets to 6 and high rip risk.

SKIP
Anything before about 8:30 while the tide is flooded. Little Point in the morning, since the tide falls all day. Calumet and Tourmo while it's this full. The Cliffs and OB on a flood high. Everything from noon to 4p once the NW fills in. Anything after dark.

GOTCHAS
Coastal Flood Advisory from 6a today through 11a Fri. The tide is running about +1.3 ft over the table, so the 8a high may reach the stairs and seawall at Drive, and the first hour will be fat and backwashy. Moderate rip risk today and high on Thursday (NWS). Beach Hazards Statement through 11p Fri. Hot inland, with NWS calling 82°F at PB, so bring sunscreen and water. Expect a pier crowd.
