DRAG ACROSS THE DAY

Drag the tide

6–9A · GLASSY BUT A VERY FULL TIDE, SWAMPY **MEH**	9:30–11:30A · PB NORTH SOFT HOME, LIGHT N TO NW 5, TIDE DROPPING **GO**	NOON–DARK · NW 10–20 KT ONSHORE, CHOPPY **SKIP**

9:00a	***PB north window, light N to NW 5, tide dropping through mid — sit inside on bigger sets***	**5.1 ft tide**	**N ~5 kt · NWS**	**3–5 ft, sets to 6 (SRF) · W 15s groundswell + S 15s, near ceiling / beyond the fish on open-beach sets**

H 6.0 @ 7:16a · L -0.2 @ 2:06p · H 4.1 @ 8:16p · obs 6.5 @ 5:48a

PB north of pier from about 9:30 to 11:30a on the Anvil twin; Tourmaline also fine once the tide drops more around 10:30a. Table tides: H 6.0 @ 7:16a, L –0.2 @ 2:06p, H 4.1 @ 8:16p. The gauge read 6.493 ft at 5:48a, about 1.2 ft over the table (coastal flood advisory through noon Tue), so the early high is swampy past 7 ft real. LJAC1 was E about 5 kt at 5:18a. NWS hourly has NE 5 mph at 6–7a, N 5 at 8–9a, NW 5 at 10–11a, and NW 10 from noon. PZZ740 calls N 10 kt becoming NW with gusts to 20 kt this afternoon.

Where it's working

PB north of pier · 9:30–11:30a

★ LOCAL and BEST (single hero). 46258 SwH 1.2 m (3.9 ft) at 15.4s W plus a W windsea around 2.6 ft at 9s, SRF 3 to 5 ft with sets to 6 and HIGH rips — near your ceiling, and the bigger open-beach sets are beyond the fish. Pier-north sandbar is the softer home pick vs Drive closeouts. Light E early, N 5 through 9a, NW 5 until noon. Scorecard live 0.97; forecast stays ~0.98 on the drop through 11a. Sit inside and give the longer sets room.

CALL

Also fine · Tourmaline ~10:30a–noon

Once the very full 7:16a high drains further, Tourmaline softens into rolling mush (scorecard climbs to ~0.82–0.86 by 10:30–11a). Softest option if the open beach feels punchy. Longboard crowd.

ALSO OK

Blacks · close on score, skip unless thruster

Live 0.96 ties LOCAL and does not clear the +0.05 drive margin. Canyon plus SRF sets to 6 puts it overhead / beyond the fish — thruster needed, none owned. If you somehow have 3 hours and a thruster, fine; otherwise stay home.

NOTE

Skip · anything before about 9a on the swampy high tide, Little Point (drowned early, then falling), open-beach Drive closeouts on the long W sets, and everything once NW 10 fills in around noon.

SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Pier-north soft sandbar is still Anvil territory if you sit inside. The bigger open-beach and Blacks sets to 6 want a thruster you do not own — stay home and pick your waves.

TW log · undersized once the sets hit chest-plus

'IKE · ONE THING TO REMEMBER

Why HIGH rips and a full tide travel together.

Long-period groundswell piles water onto the beach, and a king-tide pattern already has the gauge over a foot above the table. That setup pushes strong seaward return flows — the rips NWS is warning about. Give the bigger sets room, use the channels, and never fight a rip straight in.

SKIP

The swampy early high tide everywhere. Little Point (drowned early, falling later). Open-beach Drive closeouts on the long W sets. Blacks without a thruster (beyond the fish). Everything once NW 10 fills in around noon.

GOTCHAS

Size: SRF 3 to 5 ft with sets to 6 on mixed 280° and 210° swell — near your ceiling; the bigger open-beach sets are beyond the fish on the Anvil. Sit inside and give the longer pulses room. HIGH rip current risk today (NWS SRF). King-tide pattern: the La Jolla gauge is running about 1.2 ft over predictions and NWS has a coastal flood advisory through noon Tuesday, so the beach is narrow and backwashy near the high. Tourmaline: packed with longboards, watch for loose boards. Blacks: hike, shorebreak, canyon crowds, thruster territory on sets to 6.
