7:00a	***PB north only if no lightning: lull between showers, tide filling (about 5 to 6 ft real), S wind texture — sit inside, let the sets go***	4.1 ft tide	S ~9 kt · NWS	4–6 ft, sets to 7 (SRF) · W 14s groundswell plus a lumpy 5–6s W windsea · above your ceiling

L 2.8 @ 3:25a · H 5.2 @ 10:04a · L 0.3 @ 6:05p · obs 4.9 @ 5:54a

A fine day to skip. If you need a session, PB north of the pier from about 6:30 to 8a on the Anvil, sitting inside, and out of the water at the first thunder. Table tides: L 2.8 @ 3:25a, H 5.2

@ 10:04a, L 0.3 @ 6:05p. The gauge read 4.87 ft at 5:54a against a 3.46 ft prediction, about 1.4 ft over the table, so the high lands near 6.6 ft real and is swampy. LJAC1 ran WSW 15 kt gusting 19 in a squall near 4:48a, then NW 5 kt at 5:18a. NWS hourly has SE then S 10 mph at 6–9a with showers and thunderstorms (78% chance), SW 5 at 10a and SW 10 from 11a. PZZ740 calls S 10 kt becoming SW this afternoon, W 15–20 kt tonight.

Where it's working

PB north of pier · 6:30–8a, only if no lightning

★

LOCAL and BEST (single hero), but skip-leaning. 46258 SwH 1.5 m (4.9 ft) at 14.3s W 268° on top of a 1.2–1.6 m (3.9–5.2 ft) W windsea at 5–6s, Hs 1.9–2.1 m (6.2–6.9 ft), and NWS SRF 4 to 6 ft with sets to 7, HIGH rips, High Surf Advisory from 4p. A squall ran LJAC1 up to WSW 15 kt gusting 19 near 4:48a; it read NW 5 kt at 5:18a, and NWS has S 10 mph with showers and thunderstorms this morning. Scorecard 0.98 on the 5:30a lull, 0.82 with the forecast S wind. Above your comfort zone.

CALL

- **If you have 3 hours · Blacks**
  Scorecard 0.82 with the S wind, a tie with PB north and short of the +0.05 drive margin (46225 SwH 3.9 ft at 14.3s W). Overhead on sets at the canyon and not offshore: beyond the fish today.

  NOTE

- Skip · the swampy high from about 8:30a to noon, Little Point (hits its 5.5 ft real-tide ceiling by about 7a, dark before that), PB Point, Tourmaline and Birdrock (tide too high), and the SW-wind afternoon into the High Surf Advisory.

  SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Your best paddler for a short inside session in lumpy surf. It is too loose for 6–7 ft sets, so stay on the shoulder and let the big ones go; this is a thruster day.

TW log · way too much size, rip and chop

'IKE · ONE THING TO REMEMBER

Groundswell vs windsea.

The buoy splits the ocean into two parts. Groundswell (14s today) was made by a far-off storm and arrives as organized lines. Windsea (5s today) is being made right here by local wind, so it is short, steep and lumpy and rides on top of the swell. When the windsea is as big as the swell, the faces get bumpy and the sets break unpredictably, which is why 5 ft at 14s can still be a bad day.

SKIP

The swampy high tide from about 8:30a to noon everywhere. Little Point (hits its 5.5 ft real-tide ceiling by about 7a). PB Point, Tourmaline and Birdrock (tide too high). The SW-wind afternoon and the High Surf Advisory from 4p.

GOTCHAS

Size: SRF 4 to 6 ft with sets to 7, and the buoy reads 4.9 ft of 14s W groundswell plus 4–5 ft of short-period windsea, so this is above your ceiling on the Anvil and lumpy rather than clean. HIGH rip current risk and a High Surf Advisory from 4p today to 10a Sunday (NWS). Thunderstorms are in the morning forecast: get out at the first thunder or lightning. Rain also starts the county 72-hour runoff clock, so stay away from river mouths and storm drains. The gauge is running about 1.4 ft over predictions, so the beach gets narrow and backwashy as the high fills.
