9:00a	***PB north window, calm to W 5, tide dropping through mid — sit inside on bigger sets***	5.5 ft tide	calm · NWS	3–6 ft (SRF) · W 14–15s groundswell + SW 17s, near ceiling / beyond the fish on open-beach sets

H 6.1 @ 7:42a · L -0.4 @ 2:42p · H 3.9 @ 8:59p · obs 6.2 @ 5:48a

PB north of pier from about 9:30 to 11:30a on the Anvil twin; Tourmaline or PB Point also fine as the tide drains around 11a to 12:30p. Table tides: H 6.1 @ 7:42a, L –0.4 @ 2:42p, H 3.9 @ 8:59p. The gauge read 6.211 ft at 5:48a, about 1.1 ft over the table (coastal flood advisory through noon Tue), so the early high is swampy past 7 ft real. LJAC1 was ENE about 1 kt at 5a. NWS hourly has E 5 mph at 6–8a, calm at 9–10a, W 5 from 11a and NW 5 from 3p. PZZ740 calls E 10 kt becoming NW this afternoon.

Where it's working

★

PB north of pier · 9:30–11:30a

LOCAL and BEST (single hero). 46258 SwH 1.2 m (3.9 ft) at 14.3s W (overnight 1.2–1.5 m at 14–15s) plus a W windsea around 2.6 ft at 10s, SRF 3 to 6 ft with HIGH rips — near your ceiling, and the bigger open-beach sets are beyond the fish. Pier-north sandbar is the softer home pick vs Drive closeouts. Glassy: LJAC1 ENE 1 kt at 5a, NWS calm 9–10a, W 5 mph from 11a. Scorecard 0.98 live and through 11:30a.

CALL

- **Also fine · Tourmaline or PB Point ~11a–12:30p**
  Once the very full 7:42a high drains, Tourmaline softens into rolling mush and PB Point lines up (scorecard Point 0.98, Tourmo 0.86 by 11:30a). Softest option if the open beach feels punchy. Longboard crowd at Tourmo.

  ALSO OK

- **Blacks · ties on score, skip unless thruster**
  Scorecard 0.98 ties LOCAL and does not clear the +0.05 drive margin (46225 SwH 3.0 ft at 13s W). Canyon focus on SRF 3 to 6 puts it overhead / beyond the fish — thruster needed, none owned. Stay home.

  NOTE

- Skip · anything before about 9a on the swampy high, Little Point (drowned early, then falling), open-beach Drive closeouts on the long W sets, and the drained low after about 2p.

  SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Pier-north soft sandbar is still Anvil territory if you sit inside. The bigger open-beach and Blacks sets want a thruster you do not own — stay home and pick your waves.

TW log · undersized once the sets hit chest-plus

'IKE · ONE THING TO REMEMBER

Why a fast-draining king tide changes the wave every hour.

Today the tide drops almost seven feet in seven hours, from a 7:42a high to a −0.4 low. The same swell breaks fat and backwashy at the top, then lines up and gets steeper as the sandbars come shallow. Surf the middle of that drop, and expect the waves to get punchier the later you stay.

SKIP

The swampy early high tide everywhere. Little Point (drowned early, falling later). Open-beach Drive closeouts on the long W sets. Blacks without a thruster (beyond the fish). The drained very low tide after about 2p.

GOTCHAS

Size: SRF 3 to 6 ft on mixed 280° and 220° swell — near your ceiling; the bigger open-beach sets are beyond the fish on the Anvil. Sit inside and give the longer pulses room. HIGH rip current risk plus a Beach Hazards Statement through Tue (NWS SRF). King-tide pattern: the La Jolla gauge is running about 1.1 ft over predictions with a coastal flood advisory through noon Tuesday, so the beach is narrow and backwashy near the high, and the drain to a −0.4 low is fast. Tourmaline: packed with longboards, watch for loose boards. Blacks: hike, shorebreak, canyon crowds, thruster territory.
