<10 kt becoming W 10 kt afternoon

BOARD

Inferno 72

~72°F

QUIVER

Sharp Eye Inferno 72 Chest-to-head sets on a 15s SW groundswell with glass. Enough punch for the shortboard once the tide drains.

Anvil twin · if it stays fat and backwashy

TW log · soft evening leftovers

HOME STRETCH

LOCAL PB north · Drive · Tourmo · PB Point · Calumet · Little Point**NOT** Cliffs · OB · Scripps · Blacks · North County

'IKE · ONE THING TO REMEMBER

Long period loves a draining tide.

A 15-second groundswell wraps and organizes, but on a flood high the bars are buried and the wave dumps late. Waiting an hour or two after the high lets the sandbars come back into play so that period energy can actually draw up.

WHERE IT'S WORKING

PB north of the pier

The call. Long-period SW groundswell is the story (SwH 4.6 ft @ 15s SW at 46258 overnight, Hs 5.6). NWS has 3 to 5 ft with sets to 6 on a mixed S 200° / W 280°. Tide is still fat over the table, and this stretch handles a flood high best while the pier wedges the SW energy. Go 9:30 to 11:30 as the 8:53a high drains, while NW stays ~4 kt. Score 0.86, tied for top with LP — LP is tossed on the falling tide.

CALL

PB Drive

2

Also fine once the tide drops a bit, from about 10:30. The SW angle and 15s period suit it, but it's still a touch oversized and full right now (0.79).

ALT

3

Calumet

Score 0.77. The SW angle loves this reef, but the tide is too full until midday, which is when the NW fills to ~9 kt. Soft pass.

SOFT

Little Point

4

Score 0.86 on paper and the 15s SW is textbook — but morning is a hard no. Tide falls all day from H 5.7@8:53a to L 0.2@3:11p, and we never ride LP through a low. The 3 ft refill is around 6:45-7p, after the 6:24p sunset, so skip the evening too (or peek Windansea briefly if you're already out).

SKIP

5

Tourmaline

Score 0.72. High-tide mush through the morning, and the rips are high today.

SOFT

- Skip · PB Point is too full on this tide (0.51). The Cliffs (Garbage, Abs, Luscomb's) want a cleaner W swell and a rising low-to-mid; this fat flood high on SW/S gives them little. OB Pier wants low-to-mid too. Scripps and Blacks aren't local, and nothing there beats PB north on this tide.

LP EVENING
SKIP

Go 9:30a through 11:30a at PB north of the pier. The table has H 5.7@8:53a, but the gauge already read 6.2 ft at 7:12a — still running over the table, which is why the Coastal Flood Advisory is still up through Tuesday. Let it drain: it falls to L 0.2@3:11p, then refills toward H 5.0@9:14p. LJAC1 NNE ~2 kt @ 6:30a PT (glass). NWS hourly has NW ~4 kt 7-11a, NW ~9 kt noon-6p, and NW ~4 kt from 7p. Partly sunny, warm. Sunrise 6:47a, sunset 6:24p. Saturday holds: SRF 3-6 ft on S 210° / W 280°, then Sunday gets messy from Rachel remnants (PZZ740 seas 6-9 ft).

SKIP

Anything before about 9:30 while the tide is flooded. Little Point all day — morning falls through the low, and the 3 ft evening fill is after sunset. Calumet, Tourmo, and PB Point while it's this full. The Cliffs and OB on a flood high. Everything from noon to 6p once the NW fills in. Anything after dark.

GOTCHAS

High rip current risk today (NWS), with sets to 6 ft — watch the pier pilings and the rips running out along them. Coastal Flood Advisory through 2p next Tuesday: tide is still over the table, so the high may reach the stairs and seawall, and the first hour after it will be fat and backwashy. Beach Hazards Statement through 11p Fri. Extreme Heat Warning through 8p tonight — bring water and sunscreen. Expect a pier crowd on a solid Friday. Looking ahead: Tropical Storm Rachel remnants lift southerly swell and choppy seas Sunday (PZZ740 6-9 ft, W 10-15G20) — plan around that, not into it.
