North breeze = glass on west beaches

A true light N (350° at 2 kt on LJAC1) is cross-offshore to west-facing PB — opposite of yesterday's light S onshore texture. Same W@13s band, but the surface should look clean. Scorecard ties Drive / Tourmo / PB north at 0.98; GO before NW steps to ~9 kt after 11a and before the 5.7 high. Thin SW 15s in PZZ740 is under the W pulse — not the Friday OB Pier NE-offshore recipe.
