DAILY WEEKLY

TODAY'S CALL

GERRY BOT COWABUNGA REPORT · MON NOV 2 · NORTH PB

The swell filled in overnight and the wind is offshore, so paddle out at the Drive by six thirty. Ride it until about ten, then Little Point works on the push

GAME PLAN · MAKE THE MOST OF IT

PB Drive

WINDOW	6:30–10a · Anvil twin · ~75°F
SURF	3–5 ft (SRF), SW 14–15s groundswell + W 7–8s windswell
TIDE	H 4.2 @ 4:46a L 2.7 @ 9:49a H 4.7 @ 3:23p L 0.1 @ 10:30p obs 5.3 @ 5:48a

Two swells share one number.

if you want more.

Offshore and filling in: PB Drive early

PADDLE OUT BY	6:30	BOARD

8 /10

SURF RATING · GOOD · LIVE

Very good — move a meeting

capped by swell 4.3 ft, 14s period · Better than 84% of 50 logged PB/La Jolla mornings since 09/12

What's in the water

3-5 FT (SRF), SW 14-15S GROUNDSWELL + W 7-8S WINDSWELL

GROUND	WINDSWELL	HS BUOY
SwH 3.3–4.3 ft · 14–17s	WWH 4.6–4.9 ft · 7–8s	Hs 5.6–6.6 ft · 46258

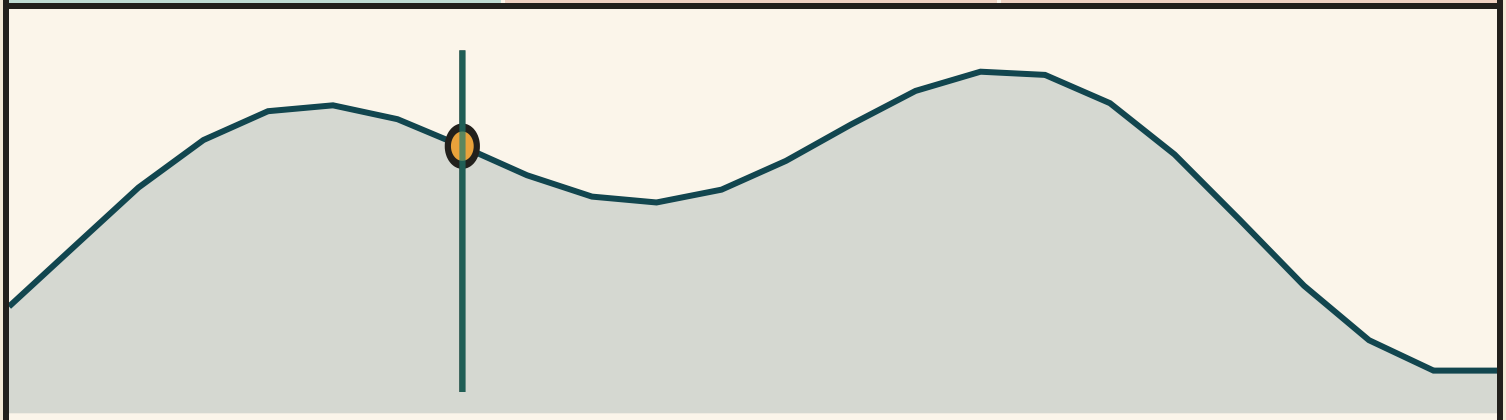

FROM **214° SW**

Buoy 46258 · Hs 5.6–6.6 ft (spectrum SwH 3.3–4.3 ft @ 14–17s SW) + WWH 4.6–4.9 ft @ 7–8s · face 3–5 ft (NWS SRF SD) · PZZ740 SW 3 ft @ 16s + W 4 ft @ 7s · wind E 11 kt at 5a, E 5 mph to 9a, NW 10 mph from 2p

DRAG ACROSS THE DAY

Drag the tide

6:30–10A · PB DRIVE, E OFFSHORE, TIDE DROPPING	10A–1P · LITTLE POINT ON THE PUSH, CALM TO NW 5 MPH	1P–DARK · NW 10 MPH, REEF OVER ITS CEILING
GO	**ALSO OK**	**SKIP**

7:00a	***PB Drive, E offshore, tide dropping to the 9:49a low***	**3.5 ft tide**	**E ~4 kt, sunny · NWS**	**3–5 ft (SRF), SW 14–15s groundswell + W 7–8s windswell**

H 4.2 @ 4:46a · L 2.7 @ 9:49a · H 4.7 @ 3:23p · L 0.1 @ 10:30p · obs 5.3 @ 5:48a

PB Drive from first light to about 10a on the Anvil twin. Table tides: H 4.2 @ 4:46a, L 2.7 @ 9:49a, H 4.7 @ 3:23p, L 0.1 @ 10:30p. The gauge read 5.3 ft at 5:48a, about 1.3 ft over the table (the SRF says 1.3 to 1.5 ft), so the morning low only reaches about 4 ft. LJAC1 was E 11 kt (gust 14) at 5:18a. NWS hourly has E 5 mph and sunny to 9a, calm at 10a, NW 5 mph late morning and NW 10 mph from 2 to 4p. PZZ740 has E 10 kt becoming NW this afternoon.

Where it's working

★ PB Drive · 6:30–10a

The swell jumped overnight. 46258 has SW groundswell at SwH 1.0–1.3 m (3.3–4.3 ft) and 14 to 17 seconds from about 214°, stacked with a W windswell of 1.4–1.5 m at 7 to 8 seconds left over from the storm, and the SRF calls 3 to 5 ft with high rips. The E wind (11 kt at the pier at 5:18a, E 5 mph in the NWS hourly to 9a) is offshore and grooms the lump. The tide drops from the 4:46a high toward the 9:49a low, which suits the Drive sandbar. Scorecard 0.99, top of the board.

CALL

2 Little Point · 10a–1p

Also fine once the tide turns. The gauge is about 1.3 ft over the table, so the real tide runs about 4.0 ft at the low and climbs to the 5.5 ft reef ceiling near 1:30p. Wind goes calm at 10a and light NW after. Scorecard at 11a: 0.98. Steep on the bigger sets for the Anvil.

ALSO OK

3 Blacks (extended)

Score 0.95 off 46225 (SwH 3.3 ft @ 15s SSW), close behind the Drive but not past the drive margin. The canyon will focus this into overhead sets, which really want a thruster you do not own yet. If you have 3 hours and want size, it is there.

IF 3 H

- Skip · PB north (0.87), Calumet (0.79), Tourmaline (0.77) and PB Point (0.52) on this high falling tide. The Cliffs, OB and anything near Mission Bay, Rose Creek or a storm drain outlet while the rain advisory is on.

SKIP

BOARD

Anvil twin

~75°F

QUIVER

Anvil twin fish

Chest to head high and offshore. It is the board you own for this size; the bigger sets would suit a thruster once you have one.

TW log · too much swell and lump for it today

'IKE · ONE THING TO REMEMBER

Two swells share one number.

The buoy height (Hs) blends every wave in the water. Today about half of it is a 7 to 8 second windswell left by the storm, which makes short, choppy bumps, and the other half is a 14 to 17 second groundswell that makes the real sets. Read the groundswell line (SwH) for set size and the windswell line for how lumpy it will feel. An offshore wind smooths the faces but cannot remove the bumps.

SKIP

Little Point before the 9:49a low (falling tide) and after about 1:30p (real tide over 5.5 ft). Everything once NW 10 mph fills in around 2p. The Cliffs, OB, Mission Bay and any creek or storm drain outlet while the county rain advisory is on. Blacks unless you want overhead sets and have the time.

GOTCHAS

Water quality: the county issued a general rain advisory for all beaches on Sunday and advises staying out for 72 hours after rain, so today is still inside it. Today is a surf call, the water is your call, and the further you are from outlets the better. High rip current risk and a beach hazards statement through 6p (NWS SRF). The buoy Hs of 6.6 ft counts both swells; the windswell part is short period and lumpy, so expect bumpy sets with longer lulls.
